Hiring Manager

IT Project Manager

Dear Sir or Madam,

I would like to apply for the IT Project Assistant position at your company.

I am currently a final-year Information Technology student with knowledge of software development, database management, project documentation, and cloud computing. During my studies, I have completed several academic projects using Java, Node.js, MySQL, Linux, and AWS. These experiences have helped me develop strong technical, communication, and teamwork skills.

Enclosed is my résumé for your consideration. I would appreciate the opportunity to discuss my qualifications in an interview at your convenience. I look forward to hearing from you.

Thank you for your time and consideration.

Sincerely,

Albus egi Saputra
